

ESG METRICS 1Q 2023

Spills

Number of spills outside of primary containment (excludes process safety events and releases of fresh water, non-fresh water, stormwater, or non-contact cooling water).

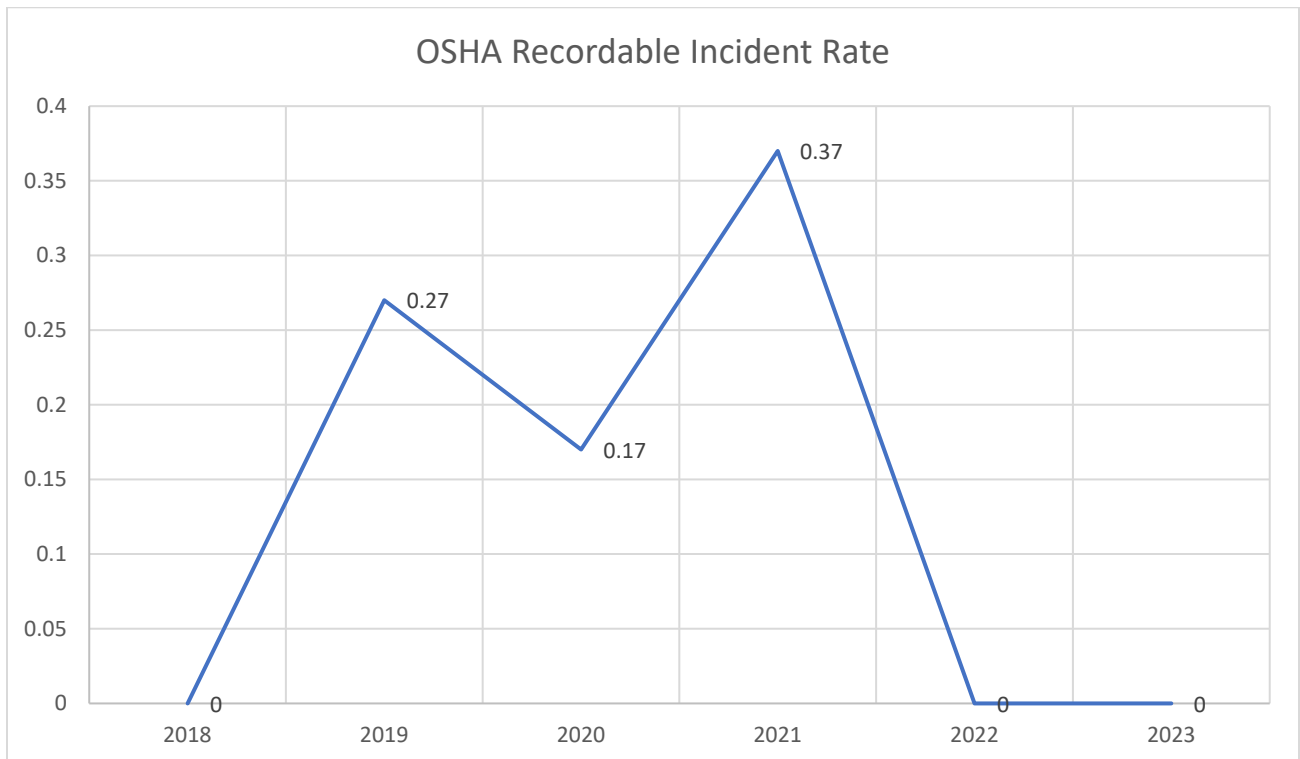

ESG METRICS 1Q 2023

Total Recordable Injury Rate (TRIR)

(Total Recordable Injury Rate per Million Hours Worked)

AMPCO has set a goal of zero fatal accidents and is aiming for ongoing reductions in incidence rates.

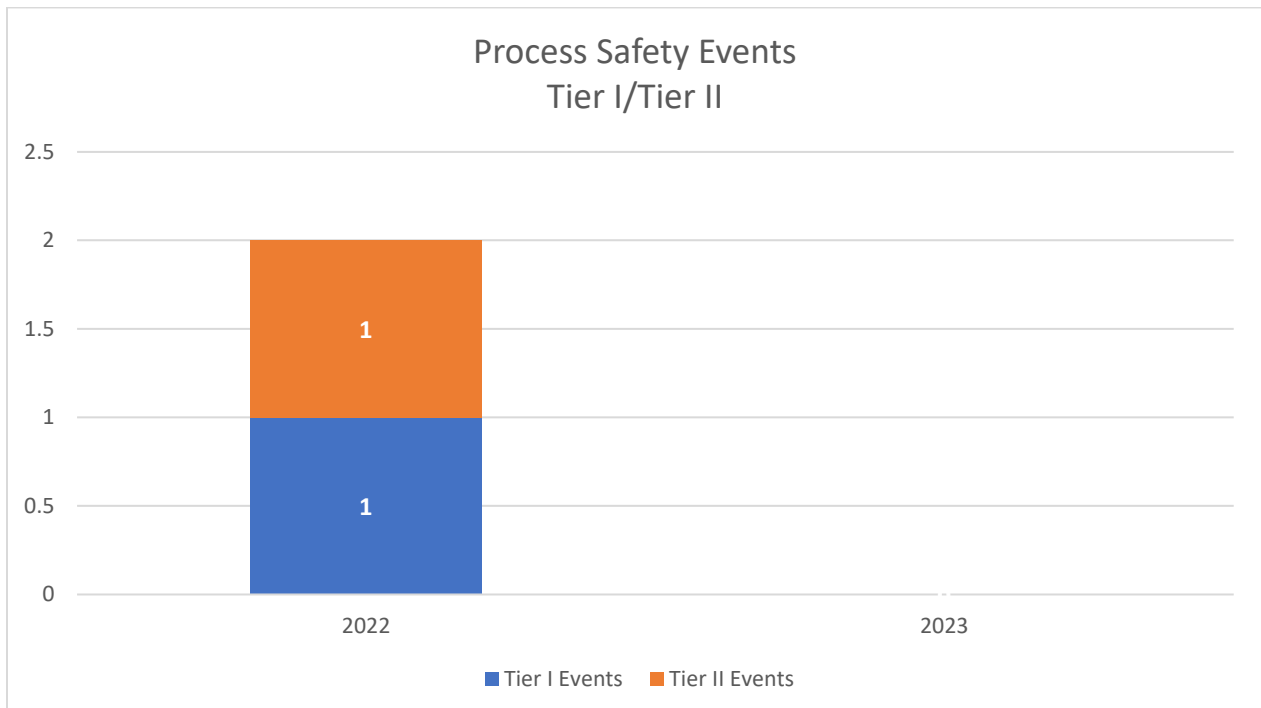

ESG METRICS 1Q 2023

Process Safety Events (Tier I and Tier II)

Process Safety Events, as defined in API RP 754 (Process Safety Indicators for the Refining and Petrochemical Industries), have been measured as Health, Environmental and Safety metric beginning in January 2021.

Calendar Year	Process Safety Events
2022	Tier I – 1 Tier II - 1
2023	Tier I – 0 Tier II - 0

ESG METRICS 1Q 2023

Greenhouse Gas (GHG) Emissions

Beginning January 2022, AMPCO has released an estimate of Scope 1 emissions (reported as million MT CO₂e) from our operating facility in Equatorial Guinea.

Scope 1: Emissions associated with combustion, flaring, venting, fugitives, and any other direct emissions sources.
