

ESG METRICS 1Q2022

Spills

Number of spills outside of primary containment (excludes process safety events and releases of fresh water, non-fresh water, stormwater, or non-contact cooling water)

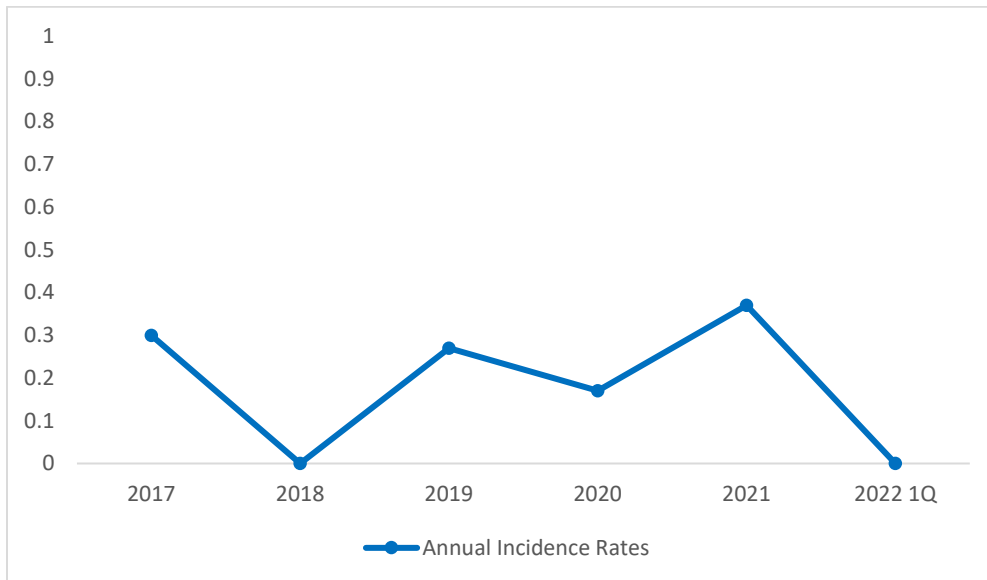

ESG METRICS 1Q2022

Total Recordable Injury Rate (TRIR) (Total recordable injury rate per million hours worked)

AMPCO has set a goal of zero fatal accidents and is aiming for ongoing reductions in incidence rates.

ESG METRICS 1Q2022

Process Safety Events (Tier 1 and Tier 2)

Process Safety Events, as defined in API RP 754 (Process Safety indicators for the Refining and Petrochemical Industries), have been measured as a Health, Environmental and Safety metric beginning in January 2021.

ESG METRICS 1Q2022

Greenhouse Gas (GHG) Emissions

Beginning January 2022, AMPCO has released an estimate of Scope 1 emissions (reported as MT CO₂e) from our operating facility in Equatorial Guinea.

Scope 1: Emissions associated with combustion, flaring, venting, fugitives and any other direct emission sources.
